

JavaScript Project

Assignment: Shopping List Manager

Course: Introduction to JavaScript

Topics Covered: Variables, Control Flow, Arrays, Functions & Array Methods

Project Overview

Create a simple Shopping List Manager.

Requirements

- Create an array named **shoppingList** containing at least **5 items**.

Task 1: Display the Shopping List (15 Marks)

Create a function named **displayItems()** to display all items.

Task 2: Add a New Item (15 Marks)

Create a function named **addItem(item)** to add an item and display the updated list.

Task 3: Remove an Item (15 Marks)

Create a function named **removeItem(item)**. If not found, display 'Item not found.'

Task 4: Search for an Item (15 Marks)

Create a function named `searchItem(item)`. Display whether the item exists.

Task 5: Count the Items (10 Marks)

Display the total number of items.

Task 6: Create a Priority List (15 Marks)

Use an array method to create a new array containing only the first 3 items.

Task 7: Demonstrate Your Program (15 Marks)

Call each function at least once and show the output.

Concepts You Must Use

- Variables
- Arrays
- Functions
- if...else
- At least five array methods: `push()`, `splice()`, `includes()`, `indexOf()`, `slice()`, `forEach()`

Submission Instructions

1. Create a file named `shopping-list-manager.js`
2. Write your solution in the file.
3. Ensure your code runs without errors.
4. Add comments explaining each function.
5. Push your work to github and submit the github link.
